Personal Statement

Software Engineering graduate and Associate QA Engineer with 2+ years of industry experience in manual and automation testing. Skilled in Playwright, Selenium, Playwright Codegen, MCP servers, API testing, accessibility testing, and test case design, with experience in Java and Python projects. Passionate about AI-driven and agentic testing, with knowledge and hands-on experience in Computer Vision, GANs, Diffusion Models, and machine learning model training. A fast learner committed to continuous technical growth and delivering high-quality software.

Professional Experience

2025 – Present
Sri Lanka

Associate Software Quality Assurance Engineer

Atlink communications

- Performed manual, exploratory, accessibility, and performance testing across web-based systems.
- Developed automated test suites using Playwright for functional and regression testing.
- Designed and independently developed an automation framework from the ground up for a software system.
- Created an accessibility testing suite using Playwright to automate accessibility checks.
- Performed website testing using Playwright MCP and Playwright CLI, exploring AI-assisted and agentic testing workflows.
- Tested RAG-based systems, validating system behavior and responses across different scenarios.
- Collaborated with development teams to identify, reproduce, and communicate software defects.

2024 – 2025
Sri Lanka

Quality Assurance Internship

Atlink Communications

- Performed manual and exploratory testing to identify functional issues and unexpected system behavior.
- Designed and maintained BDD test cases using Gherkin scenarios.
- Developed automated tests using Selenium.
- Executed regression testing to verify existing functionality after software changes.
- Reported and documented defects and worked with the development team during the defect resolution process.

Education

2022 – 2026
London

BEng (Hons) in Software Engineering

University of Westminster - Informatics Institute of Technology
Upper Second Class

2021 – 2022

Foundation Certificate in Higher Education

Informatics Institute of Technology

Skills

QA & Test Automation: Playwright, Playwright MCP/ CLI, Selenium, Cypress, API Testing, Accessibility Testing, Manual Testing, Test Case Design, AI/Agentic Testing, Performance Testing, Security Testing.

AI & Machine Learning: Python, PyTorch, Computer Vision, Deep Learning, Diffusion Models, Model Training, AI Model Testing & Validation

Programming: Python, Java, JavaScript, TypeScript, C/C++, R

Web Development: HTML5, CSS3, React, Angular, Node.js

Databases & Cloud: MySQL, MariaDB, PostgreSQL, Microsoft Azure, Apache

Tools & Workflow: Git, GitHub, Jira, Agile, MCP, Playwright MCP, VS Code, JetBrains IDEs, Figma, RStudio, Microsoft 365

Soft Skills: Collaboration, Problem Solving, Time Management, Organization, Adaptability, Leadership

Projects

2026 – 2026	AI BDD Test Case Generator and Editor Generates BDD (Gherkin) test cases from a live page/UI or a plain requirement, using a local Claude Code CLI - with a review UI to edit, revise, and export to .feature/Excel.
2025 – 2026	SketchMRI Deep learning medical imaging research synthesizing and reconstructing high-fidelity brain MRI scans from conceptual sketches using Generative Adversarial Networks (GANs) and Diffusion Models.
2024 – 2024	Web Application To Add Haptics For Videos (Phone Brr) A website for software development group project module, utilizes Python, Node.js, Gradio, and Hugging Face.
2023 – 2023	Tourism Website This project was created for the web development and design module, utilizing HTML, CSS, and JavaScript.
